(54) MULTI-CAST COMMUNICATION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a multi-cast communication system that allows each terminal equipment to make communication with a source in communication with other terminal without caring about multi-cast communication with respect to the multi-cast communication system.

SOLUTION: Plural terminal equipments 2 and a host 1 are connected in the multi-cast communication system. The host 1 is provided with a respectively means 1 receiving a communication request from each terminal equipment 2 and a communication state management table 20 storing a type of a source 3, a group ID corresponding to it, and a terminal equipment number making communication with information from the source 3. The host 1 makes multi-cast communication according to the content of the communication state management table 20.
